(For NDF Use Only)  
 State Submitting Project: Nevada Division of Forestry  
 State Priority # \_\_\_\_\_

## 2003 Western States Wildland Urban Interface Grant Program

1	Applicant Information	
	Applicant:	
	Contact Person:	
	Address:	
	Phone:	
	Fax:	
	E-Mail	
	Federal Tax ID #:	

2	Requested Grant Amount/Scope of Work	
	Dollar Amount Requested: \$	
	Explain the scope of work: (briefly describe how the grant funds will be used)	

3	Project Summary	
	Project Category: (check all that apply)	
	Hazardous Fuels Reduction	
	Information & Education	
	Homeowner & Community Action	
	Project Type: (check all that apply)	
	Assessment/Scoping	
	Planning	
Information/Education		
Implementation/Treatment		
Monitoring/Evaluation		

4	<b>Community Information</b>			
	Community Name:			
	County:		Congressional District:	
	Population:		Number of Homes:	
	Latitude:		Longitude:	
	Number of acres to be treated:			
	Identify what organization in the community is providing leadership for the project?			
	Homeowners Association:			
	Fire Department or Protection District:			
	Local Government:			
	County Government:			
	Corporation:			
	Hazard Description (Check appropriate type of interface). See page 3 for definitions.			
	Interface:			
	Intermix:			
Occluded Interface:				
Rural Interface:				
Threat Description (Check what is threatened)				
Homes:				
Businesses:				
Watersheds:				
Infrastructure:				
Economic Viability:				

5	<b>Contributors</b>	
	<p>Identify the private, local, tribal, state, and/or federal organizations that are contributing or participating in completion of this project. Include a letter, on letterhead, from each identified partner, signed by an authorized representative of that agency or organization. The letter should identify how the partner will contribute to completion of this project (funding, personnel, equipment, etc.) Do not include more than three letters of support.</p> <p><b>NOTE: If the proposed project is on property belonging to a group other than the applicant, you must include a letter from the landowner/manager granting permission for the work to be completed on that property.</b></p>	

6	<b>Proposed Budget</b>	
	<p><b>A proposed budget form must be attached to the application.</b> Applications that do not include a detailed budget will be rejected.</p>	

7	<b>Signature Block</b>	
	Authorized Signature	Title
	Date

## **Define the Interface**

### **Interface Community:**

The Interface Community exists where structures directly abut Wildland fuels. There is a clear line of demarcation between Wildland fuels and residential, business, and public structures. Wildland fuels do not generally continue into the developed area. The development density for an interface community is usually 3 or more structures per acre, with shared municipal services. Fire protection is generally provided by a local fire department with the responsibility to protect the structure from both an interior fire and an advancing Wildland fire.

### **Intermix Community:**

The Intermix Community exists where structures are scattered throughout a Wildland area. There is no clear line of demarcation; Wildland fuels are continuous outside of and within the developed area. The development density in the intermix ranges from structures very close together to one structure per 40 acres. Local fire departments and/or districts normally provide life and property fire protection and may also have Wildland fire protection responsibilities.

### **Occluded Interface:**

The Occluded Community generally exists in a situation, often within a city, where structures abut an island of Wildland fuels (e.g., park or open space). There is a clear line of demarcation between structures and Wildland fuels. The development density for an occluded community is usually similar to those found in the interface community, but the occluded area is usually less than 1,000 acres in size. Fire protection is normally provided by local fire departments.

### **Rural Interface:**

The Rural Interface Community exists in a situation where scattered small clusters of structures (ranches, farms, resorts, or summer cabins) are exposed to Wildland fuels. There may be miles

between these clusters.

# 2003 Western States Wildland Urban Interface Grant Program Proposed Budget

Applicant: \_\_\_\_\_  
Project Name: \_\_\_\_\_

Item Description	Grant	+	Match	=	Total
<u>Personnel/Labor</u> *	\$		\$		\$
<u>Operating</u>	\$		\$		\$
<u>Travel</u> (in-state travel for statewide projects only)	\$		\$		\$
<u>Sub-Contractor</u>	\$		\$		\$
